PROJECTS

E-commerce Website
Built a dynamic e-commerce site using React, Node.js, MongoDB, and RESTful APIs to manage product data and facilitate client-server communication.

React.js Node.js MongoDB
RESTful APIs Web Development

Creation of a Blog Website with PHP, Database Integration, and AWS Hosting
Fueled by a passion for web development, I expanded my programming expertise by crafting a feature-rich blog website using PHP, seamlessly connected to a database. Furthermore, I successfully deployed and hosted the blog on Amazon Web Services (AWS) to ensure its accessibility and scalability.
PHP Database Integration
AWS Hosting

TECHNICAL CAPACITY
